

# Jingle Bells Wreath

---

## Materials

42 – 46 3.5 cm (1 3/8 in) jingle bell ornaments

85 cm (33.5 in) sturdy wire

red ribbon (1.5 cm / 0.6 in wide)

red-and-white chequered ribbon (4 cm / 1.6 in wide)

## Tools

wire cutter

needle nose pliers

Show off your festive spirit and learn to make an easy and quick jingle bells wreath. This pretty DIY Christmas wreath adds festive touches to your front door, mantle or party décor! You only need a handful of bells, a piece of sturdy wire, ribbon and not more than five minutes to create this beautiful homemade craft holiday wreath. You can use the jingle bells wreath as Christmas door decoration or hang it over your mantel. You can watch the video instructions here: <http://chcotta.ge/bl0314>

## Instructions

### 1) Thread the jingle bells

Using needle nose pliers, bend a small loop in one end of the wire. Then thread the wire through the top half-circle eyelets of the jingle bell ornaments. We alternated between pairs of shiny and matte bells. Once all bells are added, slide the flat end of the wire through the looped end and use the pliers to close the wreath. Trim the wire if necessary. Bend with your hands into a round shape.

### 2) Add a ribbon and bow

Add a piece of ribbon for hanging the wreath and tie a large fluffy bow around at the base of the hanging ribbon.

## Tip

For cute mini versions, use small jingle bells and a thinner wire to create the wreaths. These would look pretty as pedants on presents or Christmas trees.
